Easily Catch Safari Zone Pokémon

To easily catch Safary Zone Pokemon.....In order to get Pokemon that are normaly found in the Safary Zone, all you have to do is: go to the safary zone, and the pokemon that you want, run away from, but there must be at least ten. The others, just throw rocks at! Then fly to Cinnibar Islands, and of to where the land and sea (you must have surf), and surf where it is half land and half water(If i were dooing this on an emulator, I would have a screen shot). The cool thing about it is, that you can battle them, and they wont run away!!!!!! If you use gameshark, and chiet, get masterballs to catch them instantly.

Raise Levels quickly(NEW!)

If you go to the Unknown Dungeon go to where the steps are and use the Super Rod. You can catch level 23 Kingler, Seaking, Seadras, and Slowbro. With the Good Rod you can catch level 10 Golden, and Poliwag. with the Old Rod you can catch level 5 Magikarp. My other code is how to raise Pokemon levels fast. Okay you know how you get to MissingNo. right? Well then put the Pokemon you wnat to raise at the top of the list and then put a Pokemon that knows Explosion or Selfdestruct in your active list. Then go fight the MissingNo. Then your weak Pokemon will come out. Then bring out the Pokemon that knows Selfdestruct or Explosion and use the move. It should faint MissingNo. and your Pokemon but the weak one will get about 1500 exp. points. NOTE: make sure the pokemon that knows Explosion or Selfdestruct has an attack level over 100 just to make sure you faint MissingNo.!

Official Pikablu(NEW!)

NOTE!: This code has been approved by Nintendo and will not mess any part of your game up.. Perfectly clean and won't erase any data!.....

To Catch Pikablu in any Version: Follow these Simple steps to catch him!

1.First you must catch all 150 Pokemon NOT I repeat NOT using GameShark.

2. Then you also must have Seventeen of your Pokemon over Level 70.

3. Then when all of these tasks are complete, go to the guy in Pewter City who asks you if you have been to the Museum yet. Say NO so he takes you to the door.

4. Then go into the museum and go upstairs and talk to the Lady who says "I want My boyfriend to catch me a Pikachu!"

5. After you talk to her, immediatly come out of the door and once you come out of the door do not take any steps forward. left, or right. Immediatly use fly and go to Celedon City.

6. Go into the Game Corner and talk to the Lady that says "Go Next Door to the Coin Exchange Corner to use your coins to get great Prizes!"

7. But this time she will say, "Hey? You have all the badges? WOW! Well then since you were nice enough to talk to me, I will give you this Pokemon I found stranded behind then Pokemon Museum, he is so strong I can not control him.But since you have all the badges, YOU TAKE HIM!

8. It will say, "You got ???????" Then when you try to use it it will just be like if you were pressing cancel and it will exit every time you click on it. Then go to Proffesor Oak and he will say the same thing he says when you give him Oaks Parcel, it will still say "YOU DELIVERED OAKS PARCEL!"

9. Then when you go into your pokemon line and it will replace the Pokemon in your first slot. So put a spearow or something in first. It will still be called ????? so go to the Nickname guy and change it to Pikablu. It has a ElectricWave, Psyshock, and Electrode... Dont ask me why its Electrode but its an awesome move.

10. It is a Level 999 and Pikablu will, Yes it will appear in your Pokedex! After 150 it will say 154 and then you look at the Pokedex Info and it will look like this...

Name: Pikablu Type: ??????? Height: 2" 3" Length: 3" 4"

Stats: Attack-999 Defense-999 Speed-999 Special-999

Attacks:

ElectricWave Psyshock Electrode SonicBoom <------- When you get 60,000 more experience points after catching it

It Learns SonicBoom when you gain around 60, 000 experience points and it kills any pokemon in one hit and it never misses!

ALL (NEW!) SECRET POKéMON!!!

Secret Unknown Pokémon

In Rock Tunnel, do not use Flash and head up and left. If you get to the right place, you will be attacked. This Pokemon will come in the form of Onix, Geodude, or Zubat, but wil use moves like Fog, Transform, Haze, and Ghost. It has a level of 82, so be careful. This only appears once.

How To Get Pikablu in Pokémon Red and Blue

In Cerulean Caverns, Pikablu is very rare, and you need Max Repel to find her. Pikablu is found by using Max Repel. Before Max Repel wears off, one Pokemon might penetrate your Repel. This Pokemon will come in any form, but is strong. This is a great Pokémon to use your Master Ball on. Pikablu will attack with moves like Tunderswift and Quicklight.

How To Get Chartres

In Poketower, run from a Haunter and a Gastly and a Cubone and use Max Repel. Gastly, Haunter, and Cubone must be right one after another. Run from each. Then use Max Repel, as with Pikablu, one will penetrate your Repel, only this one will look like a mix between Charizard and Moltres.

How To Get Charticuno

This is in Viridian Forest. He will look like a mix between Articuno and Charmander. He will attack with both Fire and Ice attacks. He may also use Psychic. This is more commonly found in Poketower. To find him, faint all of these Pokemon in this order. In Viridian Forest: Caterpie, Metapod, Weedle, Kakuna, Pikachu In Poketower: Cubone, Marowak, Gastly, Haunter. To recieve Charticuno, you must have all the Pokemon listed above.

How To Get Melomagticuno

The most powerful Pokemon. He can only be found once, and that's in Rock Tunnel. You cannot use Flash. Melomagticuno is a Poison/Ice/Fire pokemon. Walk around until an Onix appears. He must then be followed by a Zubat, he must then be followed by a Paras, then a Geodude. All these must be at least 10 steps apart. When you see him, do not run! He is a level 90 Pokemon, but just putting him to sleep will let you capture him with an Ultra Ball. He attacks with moves like Fissure, Crumble, Fireball, Melomagticunokill, and Ice Dance.

MEW: Start a new game and get a pokemon. Trade it to another version and teach it cut. Now beat the game until you get surf and strenght and skip the S.S. Anne (This is what you need cut for, to beat the rest of the game) Go to the S.S. Anne after you get the badge requirements for Surf, and Strength. Go to the Dude who asks for tickets ... and you swim just passed the dude to the right and you will find an island with a boulder on it if you have not done the access code yet then you can not push it but if you have done it then push it and a pokeball is under it get the pokeball and inside is mew the first pokegod now that you have 151 pokemon get your 3 birds out again and ... this is one part iam not sure about yet the legendary birds you either get out 3 geodudes ... or one geo. 1 gravlerand 1 golem you have to do one of these , one of them works and the other dont.

CHARCOLT: once you have those you go to the guy that tells you geodudes evolves i thing that guy is in the celadon department store you know in the game department anywayz in there ,there is a guy that is playing gb and talkto him... and he gives you charcolt i do not know if that is the right guy though.

FLARETH: now that you hae 152 pokemon.... get 4 moltres by trade or gameshark and have the 4 in your active 6 and only the moltres not any other pokemons once you do that go to celdaon dpt. store again then go to the top floor and talk to the girl who wants a drink 100 times anywayz after you do that talkto her one more time and she gets annoyed she says ... "I will give you flareth if you go away" and then she give you!

PIKABLU: now that you have 153 pokemon go to cerulean city with your surf pokemon you can have other pokemon with it but you really need your surfer go to cerulean city and go to the water (you know by the unknown dungeon) and go in the water use the item finder in the water and after while it will beep and you will... find a pokeball with a note in it the note says there is a rare pokemon by cinnabar island be prepared because you fight this one and they are strong then go to cinnabar island.. (you can not find the note without the access code) once you are at cinnabar island have the pokemon that you taught dig supposbly you dig in the water around cinnabar... supposily if you dig in the right place a pikablu appears if you do not have the master ball.. use the same stragey as you did on the 3 birds and mewtwo

MISSINGNO: you have to have traded 4 times then beat the elite four and heal your pokemon at pallet town hen fly directly to cinnabar island then swim up and down the east coast of the sea between pallet and cinnabar after while you will see Missingno.!
